# Go with the Flows!

Flows is Pydio Cells' simple yet powerful, no-code automation builder. It lets you create automated workflows, integrate with other systems, strengthen your security posture, and much, much more.

Supercharge Cells with Flows' Automations

There are lots of great document-sharing and collaboration solutions, but if you need to self-host and have enterprise-level requirements for scalability, security, flexibility and automation, Pydio Cells with Flows is your best choice.

✓ Flows is our powerful no-code scripting engine

✓ Bootstrap with off-the-shelf templates and customize

✓ Build your own workflows from scratch.

Make Pydio the exact tool your organization needs

It's as Easy as **Drag-and-Connect**	Get a Head Start with off-the-shelf **Templates**	Build **Custom Flows** with Reusable Blocks	**Integrate** With Third-Party Tools

Sharing and Collaborating with Pydio

What Can You Do With Flows?

✓ **File Management**

Automate repetitive and time-consuming file management tasks, from metadata to archiving.

✓ **System Maintenance**

Reduce the grunt work and let your admin team focus instead of managing snapshots and purges.

✓ **Access Management**

Automatically fix locked users, manage group permissions, and set custom notifications.

✓ **Data Conversion**

Provides a highly flexible and scalable toolset for extracting, reformatting and processing your data.
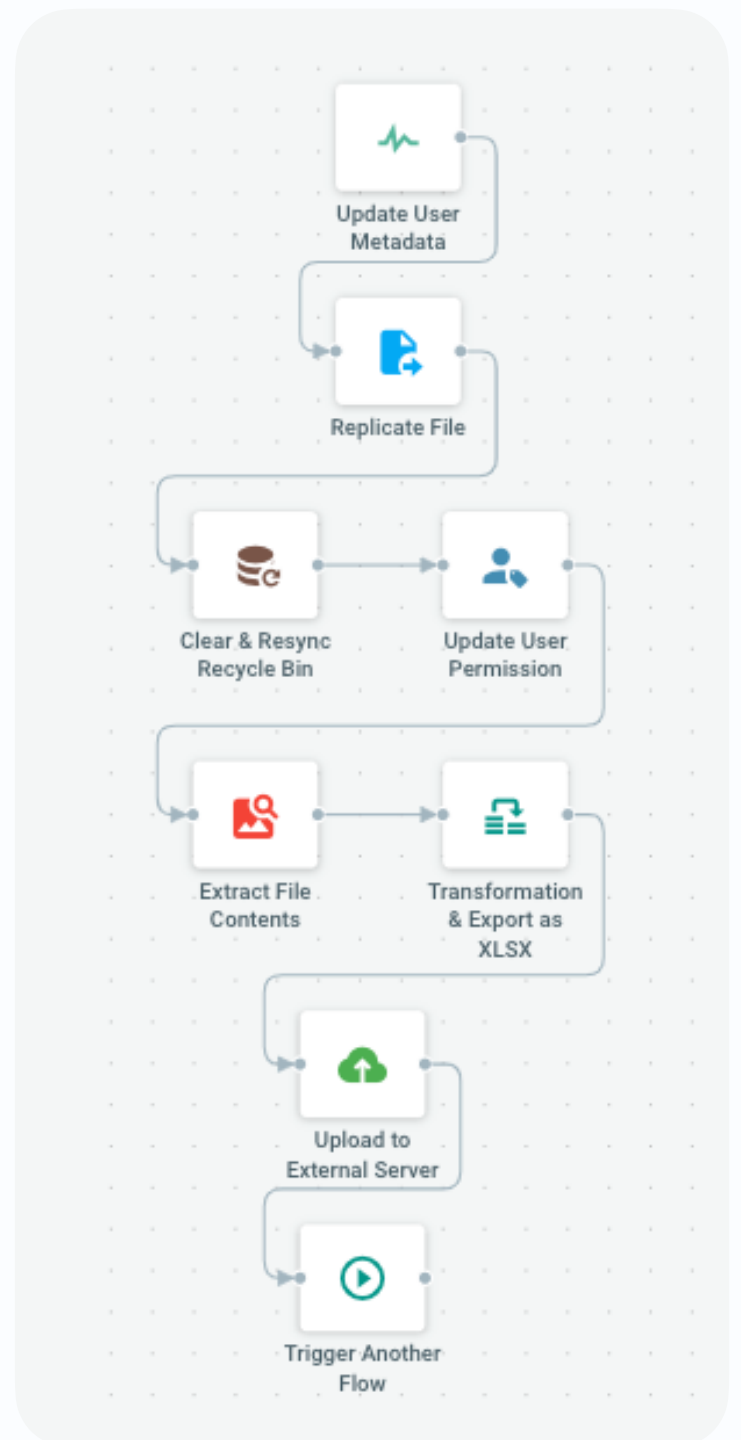

✓ **Insights & Reporting**

Cells Flows provides building blocks to automate even complex compliance and performance reporting.

✓ **Cross-platform Connectivity**

Enables enterprise-level integration and connectivity via WebHooks, FTP/HTTP, and external triggers.

✓ **No-Code to Advanced Scripting**

Fit to your exact needs by using scripting languages and variables for advanced programming.

"We were looking to reduce the amount of email and admin work and streamline time-consuming tasks. Our existing infrastructure couldn't bridge the gap: Flows addressed the challenge and helped accelerate customer service and improve productivity."

Nicolas Bauchet - Manager, Digital Solutions and Innovation, Dekra

Pricing

Pricing is based on the number of workflows you want to create. The Pydio team can provide custom development support (for an additional cost).
